EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Ledbetter on February 4, 2005.

2. The application has been amended as follows:

On page of the specification, line 3, the title "Transmission-reception Apparatus" has been removed and inserted with --Transmission-Reception Apparatus and Method For Performing Error Control--.

In claim 1, line 8, after "number" inserted --to form an omitted sequence number (OSN)--.

In claim 1, line 10, "a sequence number" has been removed and inserted with --the OSN--.

In claim 14, line 7, after "number" inserted --to form an omitted sequence number (OSN)--.

In claim 14, line 10, "a sequence number" has been removed and inserted with --the OSN--.

The examiner's amendment was made to place the claims allowable.

Allowable Subject Matter

3. Claims 1, 2, 4, and 6-14 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record, Yoshioka (US 6,330,699 B1) discloses a transmission-reception apparatus for error control using ARQ protocol. However, the prior art of record fails to teach or make obvious the step of or means for **"a deleter that deletes prescribed low order bit of the sequence number to form an omitted sequence number (OSN)"**, when such deletion is considered within the specific structure or combination of steps recited in the device of claim 1 or the method of claim 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
